I have already analyzed "Sheet1" from the "Untitled spreadsheet".

The sheet "Sheet1" has what appears to be data in the first row, rather than clear headers: "malati", "2500", "2500". The subsequent rows include:

- "gautam", "1200", "600"
- "grocery", "1500", "1000"
- "chal", "1000", "500"
- "fish meat", "2500", "1500"

To provide a more meaningful analysis, please clarify the following:

- What do the values in the first column (e.g., "malati", "gautam", "grocery") represent?
- What do the numerical values in the second and third columns signify?
- Is the very first row ("malati", "2500", "2500") meant to be a header row or is it part of the data?
